

AMROSENSE

Amorolfine Cream 0.25 w/w

AMROSENSE (Amorolfine) is a morpholine derivative, and is the first of a new class of antifungal drugs.

INDICATIONS:

This medicine is used in the treatment of fungal nail infections and fungal skin infections such as:

- Ringworm
- Jock itch
- Athlete's foot
- Seborrheic dermatitis (dry, flaky skin on face, scalp, chest, upper back, or ears)
- Pityriasis (a type of skin rash that causes scaly, discoloured patches on chest, back. Other fungal infections of skin & nails)

MECHANISM OF ACTION:

The fungal cell membranes are essential for their survival as they prevent unwanted substances into the cells and stop the leakage of cell contents. AMOROLFINE causes holes in the fungal cell membranes and kills fungi. Thereby, clears fungal infection and provides relief from cracking, burning, scaling and itching of the skin caused due to infections.

HOW TO USE:

Clean the infected area with cotton or wool , Directly apply the cream to the affected area and let it dry.

Aloesense Moisturising Lotion

*Give 360. Care & Protection
To Skin With*

ALOESENSE Moisturising cream is embedded with the goodness of skin rejuvenating ingredients like:

Aloevera Ext. , Wheatgram, Honey, Tea Tree Oil, Almond Oil & Jojoba oil. Its unique formulation provides intensive hydration to the skin and keeps it soft, supple & healthy.

BENEFITS:

This amazing product can do wonders for the skin from very first use.

- Keeps the skin hydrated & moisturised
- Repairs Skin Damage
- Helps to tighten skin
- Nourishes the skin and prevents ageing
- Helps control sebum production
- Prevents the damage from free radicals
- Nourishes the skin and prevents ageing

HOW TO USE:

Wash the face with a mild soap and pat dry, Take an adequate amount of Aloesense moisturising lotion on the fingertips and massage all over the face in a circular motion.

Clobesense Plus

Clobetasole Propionate, Miconazole Nitrate & Neomycin Sulphate Cream

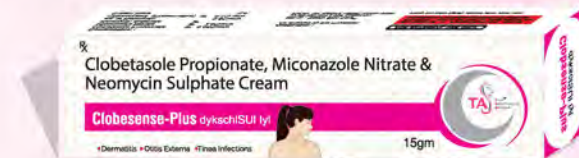

15gm

CLOBESENSE- PLUS is a combination of three medicinal compounds: Clobetasol, Miconazole, and Neomycin. This combination is generally used to treat a variety of skin disorders like Eczema, and psoriasis.

INDICATIONS:

- Eczema • Ringworm • Dermatitis • Psoriasis • Itching
- Fungal infections like Athlete's foot & jock itch.

Also Available

Clobesense-S

Clobetasole Propionate 0.05% w/v & Salicylic Acid 3% w/v

MECHANISM OF ACTION:

Clobetasol is a steroid which blocks the production of certain chemical messengers (prostaglandins) that make the skin red, swollen and itchy.

Miconazole is an antifungal which stops the growth of fungi by preventing them from forming their own protective covering.

Neomycin is an antibiotic. It stops bacterial growth by preventing the synthesis of essential proteins required by the bacteria to carry out vital functions.

HOW TO USE:

Apply a thin layer of this medicine to the affected area of the skin. Rub it gently. Protect the skin from water, clothing, or anything that causes rubbing until the medicine has dried.

COALSENSE – S

Coal tar & salicylic acid topical solution

COALSENSE – S is a combination of two compounds: Coal tar & salicylic Acid

This combination is used to treat skin conditions like psoriasis, and control seborrheic dermatitis (scaly patches and red skin on the scalp).

INDICATIONS :

- Psoriasis
- Seborrheic dermatitis
- Can also be used to treat hardening, thickening, and scaling of the skin.

HOW IT WORKS:

Salicylic acid increases moisture in the skin and dissolves the substance that causes the skin cells to stick together. It breaks down the clumps of keratin, removes dead skin cells, and softens the skin. Salicylic acid is also an anti-inflammatory agent and topical antibacterial.

Coal tar works by removing dead cells from the skin's top layer. Thereby decreasing scaling and dryness, thus relieving itchiness from various skin conditions.

HOW TO USE :

Gently rinse the affected area with saline or water before applying .

Pat the skin and dry with a clean cotton towel

Apply a generous amount of solution and spread it evenly on the

skin's affected areas with clean and dry hands.

Clinclotas-A

Clindamycin & Adapalene gel **Gel**

CLINCLOTAS is a combination of two medicinal compounds :
Clindamycin & Adapalene.

This medication is widely used for the treatment of:

- Acne (Pimples)
- Scars due to acne

HOW IT WORKS:

Clindamycin is an antibiotic which works by penetrating into the skin and killing acne-causing bacteria by inhibiting their protein synthesis.

Adapalene is a form of vitamin A which prevents accumulation of the sebum (skin's natural oil), unblocks the pores and allows natural exfoliation of the outer layers of skin.

HOW TO USE:

Apply a small amount of Gel on the affected area after washing the face with a mild soap and water.

FUROSENSE-B CREAM

Fusidic Acid 20mg & Beclomethasone
0.25mg

**FUROSENSE-B CREAM IS A COMBINATION OF TWO
MEDICINAL COMPOUNDS:**

Fusidic Acid

Beclomethasone

INDICATIONS:

- Eczema
- Contact Dermatitis And Psoriasis
- Itching
- Impetigo
(Red swollen sores around nose and mouth)

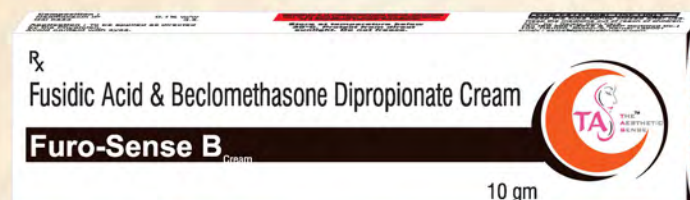

MECHANISM OF ACTION:

Betamethasone is a steroid medicine. It blocks the production of certain chemical messengers (prostaglandins) that make the skin red, swollen and itchy.

Fusidic Acid is an antibiotic. It stops bacterial growth by preventing the synthesis of essential proteins required by the bacteria to carry out vital functions.

HOW TO USE:

Directly apply a thin layer of the cream on the affected area with clean and dry hands.

Also Available

Furo-Sense

Fusidic Acid Ointment 2% W/W

HYDRASENSE

Hydroquinone 2%w/w, Tretinoin 0.025%w/w
& Mometasone Furoate 0.1%w/w Cream

HYDRASENSE is a combination of three medicines: Hydroquinone ,
Mometasone and Tretinoin.

This Combination is generally used for the treatment of a skin
condition called:

Melasma

(A skin condition characterized by brown or
blue-gray patches or freckle-like spots)

MECHANISM OF ACTION:

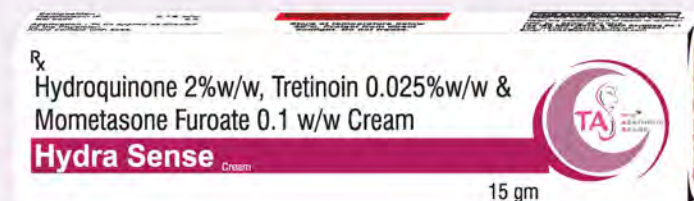

Hydroquinone is a skin lightening medicine. It reduces the amount
of a skin pigment (melanin) that causes darkening of skin.

Mometasone is a steroid which blocks the production of certain
chemical messengers (prostaglandins) that make the skin red,
swollen and itchy.

Tretinoin is a form of vitamin A that helps the skin to renew itself
more quickly.

HOW TO USE:

Take a small amount of the product and apply it across the entire
area of the skin. Wash the hands before and after its use.

Reference: www.1mg.com

Clear it up with **Ketcotas Plus** *skin's guard against infections.*

Ketcotas plus is a combination of 5 clinically proven medicinal ingredients: Ketoconazole, Iodochlorhydroxyquinoline(Clioquinol), Tolnaftate, Neomycin, and Clobetasol.

Together, they provide relief from a wide range of bacterial and fungal infections of skin.

Mechanism of Action:

Ketoconazole and tolnaftate are antifungal medications.They kill and stop the growth of the fungi by destroying its cell membrane, thereby treating your skin infection.

Clioquinol acts by interacting with DNA synthesis in fungi, thus killing the fungi that are responsible for causing the infection.

Clobetasol is a steroid. It works by blocking the production of certain chemical messengers that make the skin red, swollen, and itchy.

Neomycin is an antibiotic. It stops bacterial growth by preventing Synthesis of essential proteins required by bacteria to carry out vital function.

DIRECTIONS:

CLEAN AND THOROUGHLY DRY THE AREA THAT HAS TO BE TREATED. Apply this medication to the affected skin, usually once or twice a day or as directed by your doctor.

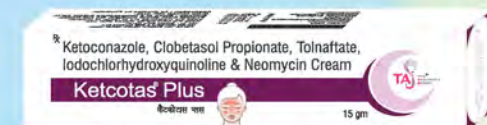

CAUTION: For external use only, Do not apply this more often than prescribed.

Some patients may experience - Irritation, redness while using this medication.

Indications:

- Dermatitis
- Tinea versicolor
(fungal infections on the skin)
- Athlete's foot
- Jock itch
- Ringworm
- Bacterial skin infections

Also Available

MUPISENSE CREAM

Mupirocin 2% W/W

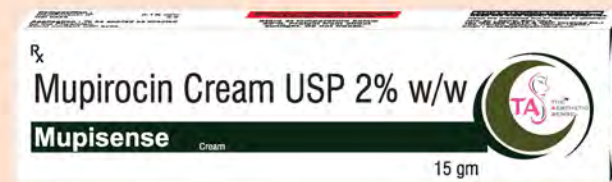

Mupirocin belongs to the class of antibiotics called Carboxylic acids ,
It prevents bacteria from growing on the skin.

INDICATION :

This medication is generally used to treat Bacterial infections like Impetigo, Folliculitis ,
Eczema and minor bacterial skin infections

MECHANISM OF ACTION :

MUPISENCE (mupirocin)is an antibiotic. It kills the bacteria that cause skin infections by preventing the synthesis of essential proteins necessary for the survival of bacteria. Thus, it prevents the skin infection from spreading.

HOW TO USE :

Directly apply to the affected area and leave as such

Reference : www.drug.com/1mg.com

NADISENSE

Nadifloxacin Gel 1% W/W

NADISENSE Gel contains Nadifloxacin as the active ingredient, It belongs to a class of antibiotics known as fluoroquinolones, primarily used to treat topical infections caused by the bacteria, including skin infections and acne vulgaris.

INDICATIONS:

- Acne & Pimples
- Impetigo
- Folliculitis
- Contact Dermatitis

MECHANISM OF ACTION:

Nadifloxacin is an antibiotic. It works by stopping the action of a bacterial enzyme called DNA-gyrase. This prevents the bacterial cells from dividing and repairing, thereby killing them.

HOW TO USE:

Directly apply to the affected area 2-3 times a day

Lucosense

Luliconazole Lotion 1% w/w

LUCOSENSE CREAM contains luliconazole as the active ingredient. Luliconazole belongs to a class of antifungal medications called AZOLES. This medication is generally used in the treatment of the Fungal infections.

INDICATIONS:

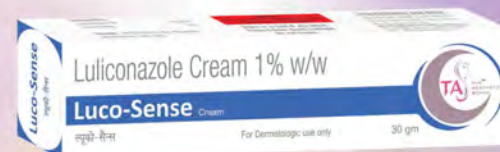

- Tinea Cruris (Jock itch)
- Tinea Pedis (Athlete's foot)
- Tinea Corporis (Ringworm of the body)
- Other fungal skin infections

MECHANISM OF ACTION:

LUCOSENSE (Luliconazole) is an antifungal medication that treats skin infections. It works by killing the fungi on the skin by destroying their cell membrane. This treats the fungal skin infection.

HOW TO USE:

Directly apply to the affected area twice a day or as directed by the doctor.

Also Available...

Lucosense

Luliconazole Cream 1% w/w

Lucosense B Cream

Luliconazole 1% w/w,
Beclomethasone Dipropionate
0.025% w/w Cream

Sertosense

Sertaconazole Nitrate Lotion/Cream 2% w/w

SERTOSENSE cream contains sertaconazole as the active ingredient. Sertaconazole is in a class of medications called imidazoles. It works by slowing the growth of fungi that cause infection.

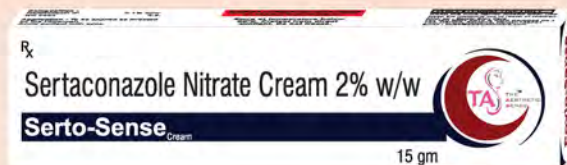

INDICATIONS:

It is majorly used to treat Tinea pedis also known as Athlete's foot - (Fungal infection of the skin on the feet and between the toes)

It can also be used to treat Tinea corporis and Tinea cruris (Itchy Rashes & ringworm caused by the Fungal infections)

MECHANISM OF ACTION:

SERTOSENSE (Sertaconazole) is an antifungal medication. It kills and stops the growth of the fungi by destroying its cell membrane, thereby treating your skin infection. It does so by inhibiting the synthesis of ergosterol (An compound which is important for the biosynthesis of cell wall)

HOW TO USE:

Directly apply the cream on the affected area, Avoid rubbing of the treated area with any clothing.

POVIOSENSE

Sucralfate 7%w/w, Metronidazole 1% w/w &
Povidone Iodine 5%w/w Ointment

POVIOSENSE Ointment is a combination of 3 medicinal compounds:-

Sucralfate

Metronidazole

Povidone Iodine

INDICATIONS:

This combination of medicines is widely used for the treatment of Bacterial skin infections.

MECHANISM OF ACTION:

Metronidazole is an antibiotic. It kills the bacteria and other microorganisms that cause infections by damaging their DNA.

Sucralfate is an anti-ulcer medicine which covers the damaged tissue and protects it against injury to facilitate healing.

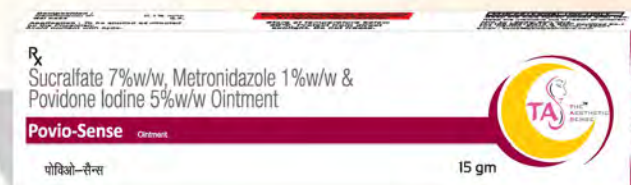

Povidone Iodine is an antiseptic. It slowly releases iodine which kills or prevents the growth of infectious microorganisms.

HOW TO USE:

Take the advised amount of Povio-sense ointment with clean and dry hands & apply on the skin's affected areas.

Cover the open wounds with a sterile dressing or bandage after applying Povio-sense ointment .

Wash your hands before and after using the ointment.

METATASK CREAM

Mometasone Furoate Cream 0.1% w/w.

METATASK (Mometasone Furoate) belongs to a class of medications called corticosteroids. It is widely used in the treatment of skin conditions like allergies, itching & rashes.

INDICATIONS:

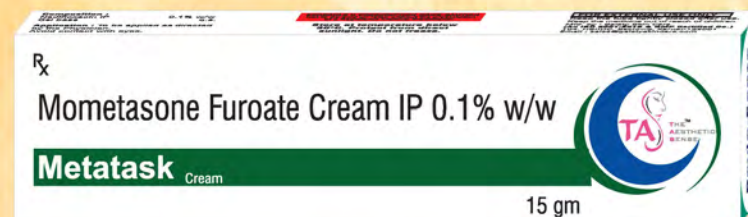

- Eczema
- Atopic Dermatitis And Seborrheic Dermatitis
- Itching, Rashes & Allergies
- Psoriasis
- Swollen And Irritated Skin

MECHANISM OF ACTION:

METATASK(Mometasone) is a synthetic topical glucocorticoid receptor (GR) agonist with anti-inflammatory, and vasoconstrictive properties. Upon administration, mometasone binds to cytoplasmic GRs and subsequently activates GR-mediated gene expression. This results in the synthesis of certain anti-inflammatory proteins, while inhibiting the synthesis of certain inflammatory mediators.

HOW TO USE;

Apply a thin film of the cream directly to the affected area after cleansing it with a mild cleanser 2 to 3 times a day.

Skincare at its best

Rewind the effects of aging

with
Kitovi Tas

Kojic Acid 0.75% w/w & Vitamin C 2.5% w/w Cream

Enriched with skin rejuvenating ingredients like kojic acid and vitamin C, this cream can do wonders for your skin.

From skin brightening to skin protection, it's a complete beauty package enclosed within a single tube.

MECHANISM OF ACTION:

Kojic acid is an anti-pigmentation medicine. It works by suppressing the formation of melanin, a pigment that gives color to the skin.

Vitamin C is an essential nutrient involved in the repair of tissue, the formation of collagen, and the enzymatic production of certain neurotransmitters.

BENEFITS:

- ✿ Skin lightening
- ✿ Treats hyperpigmentation.
- ✿ Dark spot reduction
- ✿ Skin whitening & brightening
- ✿ Heals the damage caused by sun exposure.
- ✿ Anti-aging
- ✿ Boosts collagen.
- ✿ Repairs damaged skin.

Directions: Apply twice daily on a cleansed face, followed by a wide spectrum sunscreen.

TERBOSENSE

Terbinafine Hydrochloride Lotion 1% w/v

TERBOSENSE (Terbinafine Hydrochloride) is an Antifungal medication.

INDICATIONS:

- This medication is generally used for the treatment fungal infections like:
- Athlete's foot
- Jock Itch
- Tinea corporis (Ringworm of the body)
- Tinea versicolor (A common fungal infection of the skin)
- Onychomycosis (Fungal infections of fingernails, and toenails.)

Also Available TerboseNSE Tablets

Terbinafine Tablets 250 mg

TerboseNSE Cream

Terbinafine Cream 1% w/w

MECHANISM OF ACTION:

TERBOSENSE (Terbinafine) provides a fungicidal effect by inhibiting the enzyme squalene monooxygenase, which is involved in the synthesis of sterol in fungi. This inhibits fungal sterol biosynthesis by decreasing ergosterol levels (ergosterol is an important component of fungal cell membranes).

DIRECTIONS:

- Clean and dry the affected skin properly.
- Then, apply a thin layer of TERBOSENSE Lotion on and around the affected skin gently.
- Do not cover the area after applying the lotion, unless specified by the doctor.

STRETCH FADE

Anti Stretch Marks Cream

STRETCH FADE is made with miraculous ingredients which helps in reducing the appearance of stretch marks.

Key Ingredients :

LACTIC ACID :- Fades mild hyperpigmentation like stretch marks, dark spots, age spots and acne scars

GLYCERIN :- It can help reduce the appearance of scars

SODIUM LACTATE :- Enhancing the skin lightening effect

BEESWAX :- Contains vitamin A, which is helpful in reduction of stretch marks.

Application:

As directed by the Physician

TASMASONE

Mometasone Furoate Cream 0.1% w/w. **CREAM**

TASMASONE (Mometasone Furoate) belongs to a class of medications called corticosteroids. It is widely used in the treatment of skin conditions like allergies, itching & rashes.

INDICATIONS:

- Eczema
- Psoriasis
- Swollen And Irritated Skin
- Atopic Dermatitis And Seborrheic Dermatitis
- Itching, Rashes & Allergies

MECHANISM OF ACTION:

TASMASONE (Mometasone) is a synthetic topical glucocorticoid receptor (GR) agonist with anti-inflammatory, and vasoconstrictive properties.

Mometasone binds to cytoplasmic GRs and subsequently activates GR-mediated gene expression. This results in the synthesis of certain anti-inflammatory proteins, while inhibiting the synthesis of certain inflammatory mediators.

HOW TO USE:

Apply a thin film of the cream directly to the affected area after cleansing it with a mild cleanser 2 to 3 times a day.

TACNOMUS

Tacrolimus Ointment 0.1% & 0.03% w/w

Tacrolimus belongs to a class of medications called topical calcineurin inhibitors.

Tacrolimus is mainly used to treat the symptoms of eczema (atopic dermatitis; a skin disease that causes the skin to be dry and itchy and to sometimes develop red, scaly rashes) in patients who cannot use other medications for their condition or whose eczema has not responded to another medication.

INDICATIONS

Eczema

Psoriasis

Dermatitis

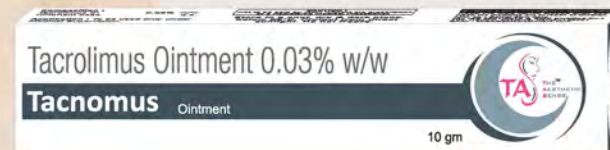

vitiligo

HOW IT WORKS:

Tacrolimus is an immunosuppressant. It works by stopping the immune system from producing certain substances that can cause eczema and other skin infections like Psoriasis, Dermatitis & vitiligo.

HOW TO USE:

- Wash your hands with soap and water.
- Be sure that the skin in the affected area is dry.
- Apply a thin layer of tacrolimus ointment to all affected areas of your skin.
- Rub the ointment into your skin gently and completely.
- Wash your hands with soap and water to remove any leftover tacrolimus ointment.
- Do not wash your hands if you are treating them with tacrolimus.

Corocare

Cetrimide 0.5%w/w **SOAP**

COROCARE Medicated Soap contains Cetrimide as an Active ingredient. Cetrimide is an antiseptic and disinfectant used topically for wound cleansing and the treatment of some skin disorders.

USES:

- ◆ Used to treat Dermatitis & Pimples
- ◆ Provides protection to the skin against Bacterial, Viral & Fungal Infections
- ◆ Scaly, flaky & itchy scalp
- ◆ Treats Nappy Infections.

MECHANISM OF ACTION:

Cetrimide is a cationic surfactant. It destroys or damages the cell membrane by lowering surface tension. It causes microbial protein denaturation and produces antiseptic action.

DIRECTIONS:

Use as prescribed by the doctor.

ALOE T SENSE SOAP

Aloe-vera , Vitamin-E & Glycerine Soap

ALOE T SENSE Soap is a unique combination of skin rejuvenating ingredients like aloe vera & Vitamin-E & Glycerinw, which are scientifically and ayurvedically proven to keep the skin healthy & glowing.

BENEFITS:

- Helps to moisturise the skin
- Helps soothe sunburn
- Boosts healing of wounds
- Fights skin-ageing
- Reduces infection and acne
- Lightens blemishes on the face
- Protect your skin from damage caused by free radicals.
- Can be applied to scalp to keep dandruff & hair fall at bay

HOW TO USE:

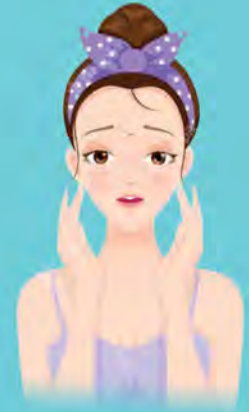

Use as directed by the Dermatologist.

COALSENSE SOAP

Coal tar 1% w/w & salicylic acid 3% w/w SOAP

COALSENSE SOAP is a combination of two compounds: Coal tar & salicylic Acid

This combination is used to treat skin conditions like psoriasis, and control seborrheic dermatitis (scaly patches and red skin on the scalp).

INDICATIONS :

- Psoriasis
- Seborrheic dermatitis
- Can also be used to treat hardening, thickening, and scaling of the skin.

HOW IT WORKS:

Salicylic acid increases moisture in the skin and dissolves the substance that causes the skin cells to stick together. It breaks down the clumps of keratin, removes dead skin cells, and softens the skin. Salicylic acid is also an anti-inflammatory agent and topical antibacterial.

Coal tar works by removing dead cells from the skin's top layer. Thereby decreasing scaling and dryness, thus relieving itchiness from various skin conditions.

HOW TO USE :

Use as directed by the Dermatologist

PERMI SENSE

Permethrin Soap 1% w/w

PERMI SENSE Soap contains Permethrin as active ingredient.

INDICATIONS:

Permethrin is an Antifungal medication, It is generally used in the treatment of :-

- Scabies
- Head lice

MECHANISM OF ACTION:

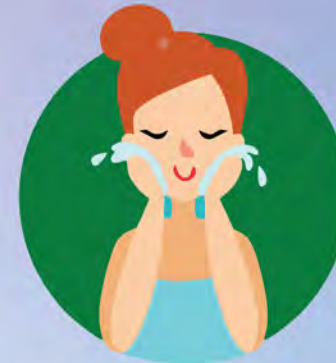

Permethrin, a pyrethroid, is active against a broad range of pests including lice, ticks, fleas, mites, and other arthropods.

Permethrin acts on the nerve cell membrane to disrupt the sodium channel current by which the polarisation of the membrane is regulated.

HOW TO USE:

For scabies: Apply soap on the body until lather. Keep for 3-5 minutes. Wash it with water thoroughly.

For lice: apply on the scalp. Massage gently. Leave it for 10 minutes. Wash with water. And then comb.

Mon Sense

Medicated Soap

Monosulfiram Soap 5% w/w

Monosulfiram is an ectoparasiticide used in the treatment and prevention of scabies. It is usually sold as a solution or medicated soap, sometimes in combination with benzyl benzoate.

BENEFITS:

- Kills mites that cause scabies and skin related problems.
- Protects skin against irritation, inflammation rashes & redness.
- Works effectively against lice.

MECHANISM OF ACTION

Monosulfiram is toxic to the mites. Once the mites come in contact with monosulfiram, they cannot move. Thereby giving an immediate relief from itching. Within a few hours of exposure to this medicated soap, the mites die, thus curing scabies & infections associated with it.

HOW TO USE:

Apply **MONSENSE** soap all over the body paying special attention to the folds of the skin. Lather liberally. Rinse off with lukewarm water. After bathing, the body should be allowed to dry naturally or dried with a towel using a 'blotting' action.

CALLYRIUM BODY LOTION

Calamine Body lotion.

CALLYRIUM (Calamine) is widely known for its effectiveness in skin irritation.

INDICATIONS:

- Skin Irritation
- Itchiness
- Skin Inflammation
- Minor sun burns
- Insect Bites
- Helps in preventing Acne breakouts

HOW IT WORKS: -

(**CALLYRIUM LOTION**) Calamine is a mixture of zinc oxide and iron oxide. It acts as an antipruritic agent when applied topically. Calamine and zinc oxide produce astringent effects in the skin or mucous membranes by coagulating protein, allowing new tissue to regenerate underneath and commonly used to reduce the extent of weeping in dermatitis and to check oozing and discharge in other mild disorders.

HOW TO USE:

Topical- Apply 1-4 times/day. Apply enough medicine to cover affected skin areas and rub in gently.

FRUPAYA HALDI & CHANDAN FACE WASH.

Embedded with the goodness of natural ingredients like Haldi & Chandan Frupaya face wash serves as an all rounder in the skin care regime.

BENEFITS

- Keeps pimples & Acne at Bay
- Efficiently cleanses the skin and removes dirt and oil
- Nourishes the skin
- Boosts collagen
- Removes dead skin cells
- Anti-aging properties

HOW TO USE

- Wet the face with water
- Take an adequate amount of face wash in the palm of the hand
- Gently massage on the skin to form a lather for 2 minutes
- Wash off with water
- Pat dry with a clean and dry towel.

ALSO AVAILABLE
Frupaya-Face Wash
With Papaya Extracts

MINTASENSE-F

Minoxidil 5% and Finasteride
0.1% Topical solution.

MINTASENSE-F is a combination of two medicinal ingredients which are clinically proven for preventing hair fall and promoting hair growth.

INDICATIONS:

- Hair Fall
- Alopecia or Male pattern Baldness

MECHANISM OF ACTION:

Minoxidil is a vasodilator, it widens the blood vessels and provides better blood flow to the hair follicles. This prevents hair loss and stimulates re-growth resulting in longer, thicker and increased numbers of hair.

Finasteride is a 5-alpha-reductase inhibitor. It blocks the production of a male hormone (DHT-Dihydrotestosterone) in the scalp that stops hair growth, thereby reversing the balding process and preventing further hair loss.

HOW TO USE:

Make sure the hair and scalp are clean and dry.
Spray directly onto the affected area.
Massage with fingertips till it gets absorbed into the scalp completely.

ALSO AVAILABLE-
MINTASENSE PLUS
Procapil 1% Hair serum.

Wet your face with water

Pump out the foaming face wash and massage gently all over your face to remove impurities.

Rinse and pat dry.

Germic-Sense

Germicide Gargle

Povidone Iodine Solution I.P.2% W/V

Germic-Sense

Germicide Gargle

Povidone Iodine Solution I.P.2% W/V

Germic-Sense Gargle contains povidone iodine which kills a wide range of germs including bacteria, viruses, fungi, and spores.

It is used for the treatment of acute infections of the lining of the mouth and throat.

MECHANISM OF ACTION:

Iodine present in GERMIC-SENSE GARGLE penetrates into the microorganisms and oxidizes key proteins, nucleotides, and fatty acids, eventually leading to their death, thereby treating the infection.

HOW TO USE:

- Pour Germic-Sense Gargle into the cup. Dilute with an equal amount of warm water if taste is an issue.
- Swish part of the solution briefly in the mouth and spit it out.
- Tilt your head backwards and gargle for a total of 30 seconds via swirling the liquid at the throat.
- Spit out the solution. Repeat every 2-4 hours or as directed by your physician/dentist or pharmacist.

INDICATIONS:

- Gingivitis (inflammation of the gums)
- Mouth ulcers.
- Can also be used for cleansing the mouth (oral hygiene) before, during and after dental and mouth surgery.

TERBOSENSE DUSTING POWDER

Terbinafine 1% w/w Dusting Powder.

*Easy Application
Long Lasting Effect*

TERBOSENSE (Terbinafine) Terbinafine is an antifungal medicine that works by killing the infection fungus

Helps Treating:

- Athlete's foot
- Jock Itch
- Tinea corporis (Ringworm of the body)
- Tinea versicolor (A common fungal infection of the skin)
- Onychomycosis (Fungal infections of fingernails, and toenails.)

MECHANISM OF ACTION:

How it works: TERBOSENSE (Terbinafine) works by destroying the fungal cell membrane thereby killing the fungi.

(It destroys fungal cell membrane by inhibiting ergosterol synthesis)

How to use: Dust the powder over affected parts of the body or as directed by the physician. Wash the hands before and after using the powder

KETCOTAS DUSTING POWDER

Ketoconazole 2% w/w Dusting Powder.

KETCOTAS (Ketoconazole) is an antifungal medication, used to treat certain serious fungal infections in the body.

Helps Treating:

- Sweat rash (intertrigo)
- Athlete's foot
- Ringworm
- Jock itch

MECHANISM OF ACTION:

Ketoconazole blocks the synthesis of ergosterol (found in cell membranes of fungi). They kill and stop the growth of the fungi by destroying its cell membrane, thereby treating the skin infection. It is used to treat skin infections caused by a fungus (yeast). It can also prevent them from coming back.

DIRECTIONS:

Dust the powder over affected parts of the body or as directed by the physician. Wash the hands before and after using the powder

ITOTAS DUSTING POWDER

Itraconazole 1% w/w Dusting Powder.

Say goodbye to fungal infections

*Easy Application
